WHO WE ARE?

INDcool Introduction

Introduction

Major General R.C. Padhi, Retd.
Mentor & CEO

INDcool Electricals Private Limited is a startup group based in Delhi. The group started its journey in the year 2004 under the name Comtech Enterprises.

INDcool is a distinguished name in Indian industry and now it has become one of the well recognized appliances company of India. Our vision is to be the customer's chosen partner for appliances solutions. Our mission is to constantly reward our employees who have built a strong credibility amongst our clients.

INDcool has extensive experience in the design and has strategic alliances with equipment manufacturers to give a competitive Edge.

INDcool has a wide range of energy efficient 5 star rated ISI marked Fans, Geyser's, Air Conditioner's, Room Heater's, Immersion Rod, Exhaust Fan's, Water Cooler, Fresh Air Fan's and many more.

INDCool has developed a reputation to provide good quality appliances and after sale follow-up.

We realize that the true value in any association is through shared interests and our endeavour is to constantly exceed our client's expectations and give them total customer satisfaction.

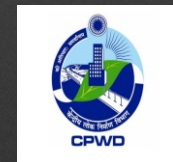

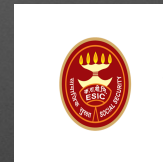

INDcool has become a significant Manufacturer/Supplier of appliances in various Government and Semi- Government organizations as well as Corporate Houses.

INDcool Operation Areas

Smart Control

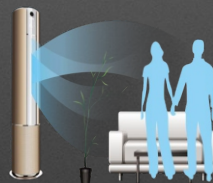

Dynamic partition

By judging and tracking the number of people indoor and their position, **I N D c o o l** human body sensing technology can realize supplying air to human activities area.

Smart air flow

I N D c o o l human body sensing technology realized the "follow me" and "avoid me"(keep air blow away from people) function, to make you enjoy anytime and anywhere.

follow

avoid

Smart Control

Offline Voice-Control

Support up to many languages in the world

1. Completely offline voice analysis, no network is required to work.
2. The functions of the air conditioner can be controlled by voice without the help of smart speakers.
3. **INDcool** Greeno Series model uses high-performance AI dedicated chips, integrating voice neural network algorithms to achieve fast dual-microphone pickup, noise reduction, recognition, command feedback and interaction, supporting 300ms rapid response.
4. With an ultra-low power consumption, the standby power consumption of the Greeno Series is only 100mW, which meets the energy-saving requirements of the standby power consumption of home appliances.

Smart Control

IoT Smart

With **NDcoo** exclusive smart APP(support both Android and IOS system), the smart AC could be connected with WIFI and cellular data, then all the family members could use their terminal devices such as mobile phone, pad or tablet to control the AC everywhere.

Business data

DC-Inverter

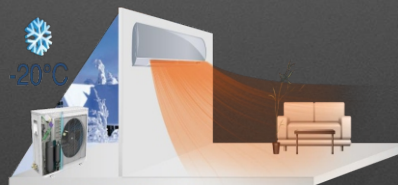

Rare Earth Compressor

DC-inverter rare earth compressor, with internal and external DC motor, DC inverter technology, more energy-saving, silent, stable performance.

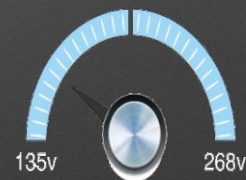

-10°C Ultra-low Temp Start

INDcool DC inverter use digit start tech, -10°C low temperature start as usual, strong heating input.

Wide Voltage Range Start

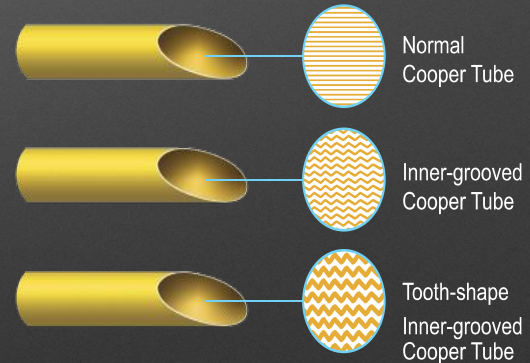

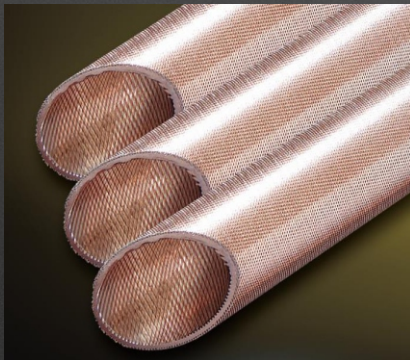

INDcool inverter air conditioner with 135v-268v wide voltage range to match all kinds of tough environment.

Energy Saving

Tooth-Shaped Inner-Grooved Copper Tube

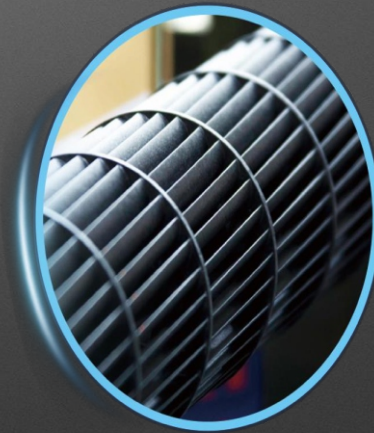

By adopting new tooth-shaped design and high efficiency inner grooved copper tube technology to enlarge the area between refrigerant and copper , the efficiency of heat exchange can be improved by 30-50%.

More Quiet

Non Equidistant Fan

INDcool AC use non equidistant fan, scatter sound source, less resonance ; reduce frequency of oscillation, effectively lower noise, and has obtained **BIS**

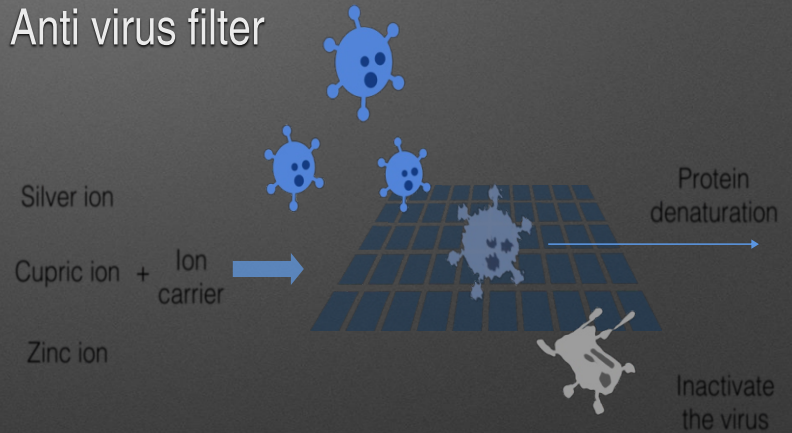

Health

Mildew proof

When the air conditioner is turned off, the fan will continue to work for 3 minutes and thus will keep the unit from mildew.

Anti virus filter

- Nanometer level, permeable and built in to destroy the structure of DNA and RNA.
- Denaturing the protein.
